WORKS

A cyclist in a dark blue jersey and black shorts is riding a road bike on a paved road that curves through a lush green forest. The sun is setting in the distance, creating a warm, golden glow. The road is flanked by dense trees and bushes. The cyclist is positioned in the lower right quadrant of the frame, moving away from the viewer.

December 2017

## Geometry 2017/18

**Introducing Field Works.**  
Highly crafted TIG-welded  
steel framesets, manufactured  
in limited numbers in house  
at the Field Cycles Workshop,  
Sheffield UK.

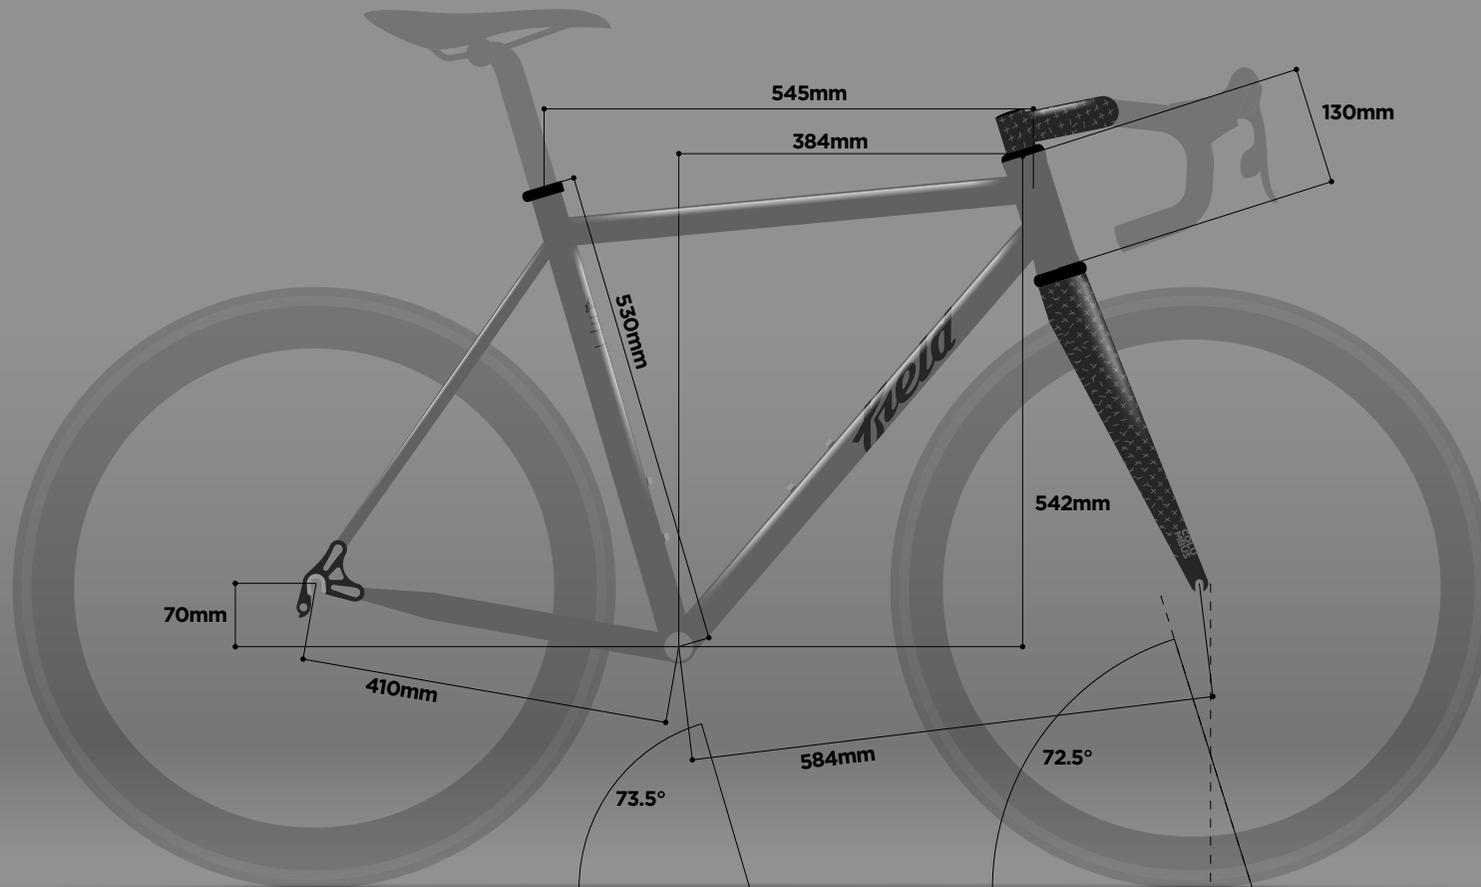

Field Works is the distillation of everything that's gone into every Field to leave our workshop. The framesets share our own unique proprietary frame parts found on our bespoke bicycles and are finished with the same unmistakable Field aesthetic and flair but forgo the full custom process.

By refining our process and streamlining our production method we're able to produce extremely sought after bicycles with much shorter wait times. Combining serialised paint designs with a choice of colour ensures each Field Works Bicycle shares the same aesthetic upon which Field's visual style is founded, each bicycle is truly one of one on planet earth.
